

DESCRIPTION

ATF DSG is a synthetic fluid for dual clutch transmissions. It protects clutches and sustains consistent launch and anti-shudder durability for the lifetime of the transmission. It ensures performance at low temperature for the mechatronics, protection at high temperature for the gears and heat dissipation for the clutches and gears.

SUMMARY OF BENEFITS

- Protection of the transmission against wear and corrosion
- Lubrication of the clutches, gears, shafts, bearings and synchronizers plus excellent torque retention
- Excellent heat dispersal for the entire system
- Outstanding hydraulic actuation of the clutches and gear change
