

# ATF SYN MULTITRANS

Code: 9350  
Date: 07-03-2024

## DESCRIPTION

**ATF SYN MULTITRANS** is a new generation multipurpose, full synthetic Automatic Transmission Fluid developed to cover virtually all ATF specifications. With the exception of CVT, DCT transmissions and Ford "Type F" transmissions, ATF SYN MULTITRANS is truly a one stop Automatic Transmission Fluid. Designed to meet Japanese, American and European transmissions, ATF SYN MULTITRANS is the perfect choice for the consumer who does not want to carry multiple drums of product.

## SUMMARY OF BENEFITS

ATF SYN MULTITRANS is a very versatile fluid and can be used in almost all Japanese and many European and American vehicles as a service fill and may also be used as a power steering fluid and in hydraulic systems particularly where high temperatures are encountered.
